BCS Information security and IT governance

Around the world, more organisations than ever before are storing sensitive business and personal information, making data protection and privacy legislation a key concern in business today. With evolving technology and new laws emerging on a regular basis, employers are actively looking for IT professionals with information security expertise.

Information security and IT governance certification

Our certification covers the range of skills needed for an organisation to manage effective information security and IT governance.

They give IT professionals the knowledge and expertise to improve current processes in their workplace and provide them with industry recognition of their security credentials.

The certificates are designed for anyone with responsibility for information security in their day to day role, as well as IT professionals in other disciplines who need an understanding of information security concepts.

Foundation Information Management
Security Principles
Data Protection

Practitioner Business Continuity Management
Data Protection
Freedom of Information
Information Risk Management
Information Assurance Architecture
